Befitting for the country

Saudi Aramco surpasses odds, with a new year of achievements

Mohammed Adarbeh

For those betting that Saudi Aramco would stumble after the attacks on Abqaiq and Khurais, they were wrong. The energy giant bounced back after the attacks stronger than ever. Plans and projects remain on track, and with business continuity at the forefront, the company met all demands for oil and gas to our customers.

On the Kingdom’s National Day this year, Aramco retains its position as a driver of the economy and an enabler of the ambitious reforms in Saudi Vision 2030. Even in a year of great difficulty, including the pandemic, Aramco plays a leading role in meeting energy demands for the globe.

September 2019

Production back in record time

The company’s facilities in Abqaiq and Khurais resumed operations following the attacks that took place on September 14. The rapid response highlighted the resilience of the company’s employees, and Saudi Aramco’s commitment to supplying the world with the energy it needs.

December 11, 2019

IPO — historic listing

The announcement of listing the company’s shares for the first time on the Saudi Stock Exchange (Tadawul), following a huge IPO with a total value of $25.6 billion. The IPO attracted more than 5 million shareholders, during which the Kingdom sold 3 billion shares.

January 13 - 15, 2020

A first: Dhahran hosts International Petroleum Technology Conference (IPTC)

For the first time in the Kingdom’s history, Saudi Aramco hosted IPTC in the Dhahran Expo Center. The event — among the most prominent in the oil and gas industry — was a great success, with 17,000 attendees, and 1,200 organizations from 70 countries participating.

March 4, 2020

Eastern Province Female Driving Academy

The Eastern Province Academy for Women’s Driving was inaugurated in Al-Ahsa — the largest of its kind in the Middle East. This initiative is part of social responsibility programs and women empowerment efforts made by the company — where over 250 Saudi women work in the Academy.

March 10, 2020

International partnership with Formula 1

A long-term partnership with F1 was announced — the first international sporting event that Saudi Aramco has supported, with a global audience of 500 million. The partnership will strengthen our brand, while developing engine and vehicle technologies for a more sustainable future.

March 1, 2020

Record production

A historic level of the production of 12 million barrels of crude oil per day, to meet consumers’ energy demand. Saudi Aramco’s departments stepped up to achieve this in less than 21 days — despite the difficulties caused by the pandemic.

April 1, 2020

Supporting national efforts to combat the pandemic

As part of its support to the Kingdom’s efforts to combat COVID-19, the company provided $200 million to the Health Endowment Fund with the Ministry of Health. Also, a donation campaign was organized for employees, targeting families affected by the pandemic — benefiting over 20,000 families.

June 17, 2020

SABIC acquisition

The announcement of Saudi Aramco’s acquisition of a 70% stake in SABIC, amounting to $69.1 billion. This step strengthens the company’s global presence within the chemicals industry, and accelerates the growth of the future strategies for Downstream operations.
message from the CEO: looking back on a year of resilience, endurance, and reliability

Last year, we marked Saudi Arabia’s National Day less than two weeks after the unprecedented attacks on Aramco’s facilities at Abqaiq and Khurais. It was a defining time in our history as we collectively rose to the challenge, demonstrating our determination as well as our resilience to the world.

This year, as we celebrate the Kingdom’s 90th National Day, we once again find ourselves facing yet another defining point with the ongoing COVID-19 pandemic that has paralyzed significant parts of the global economy.

In Saudi Arabia, every effort is being made to limit the impact of COVID-19, and in recent weeks, the trend has been going in the right direction. This is directly due to the relentless dedication of many heroes across this great country — from the health care workers who are standing tall on the front lines to every individual who continues to be vigilant to minimize the spread of COVID-19 among their family, friends, and colleagues.

At Aramco, we are also doing all we can to ensure the well-being, health, and safety of our employees and their dependents, as well as our contractors and communities. We have demonstrated our resilience by continuing to provide an uninterrupted supply of energy to customers around the world while delivering on commitments to our shareholders. We have also continued to invest in key areas, including completing the acquisition of SABIC, as well as the ongoing pursuit of promising initiatives that support the Kingdom’s efforts to achieve its climate change and sustainability objectives.

We should also be confident about all that we can achieve together going forward. My confidence in our continued success is based on the dedication you bring to our company and on your demonstrated ability to deliver no matter what challenges come at us.

So, as we celebrate our beloved country’s National Day, I want to take this opportunity to sincerely thank you for your individual and collective contributions to the company, to the Kingdom and to building a better future for all. Whether you are celebrating at home with family, or going out to take part in activities in the community such as the many programs at the King Abdulaziz Center for World Culture (Ithra), I also urge you all to continue to remain vigilant in the fight against COVID-19. Stay safe!

Amin Nasser, President and CEO
In 2020, the Kingdom can add its own outstanding reaction to the global COVID-19 pandemic. Building on their hard-earned experience in dealing with the MERS Coronavirus in 2015, Ministry of Health officials and Saudi health care providers moved quickly, establishing protocols for handling large numbers of patients with respiratory illnesses, while ensuring that doctors and nurses had the adequate equipment and medicines to treat them.

But, the Kingdom’s medical response — supported by Johns Hopkins Aramco Healthcare — are just part of the story. When COVID-19 struck, the company had just completed a successful public listing of company stock on the Tadawul, confirming our status as the world’s most valuable company.

Demonstrating the company’s capacity to meet energy demands, the company created a COVID-19 Task Force and promptly made plans to both protect its people and communities, and to meet the Ministry of Energy’s commitment to increase production to a record maximum sustained capacity of over 12 million barrels a day.

As a key driver of the Kingdom’s economy, and an enabler of the Kingdom’s ambitious goals for economic and social transformation through the Saudi Vision 2030, Aramco knew that it had no option but to meet its many commitments. Moreover, in coordination with the Kingdom’s agencies, the company’s response to the COVID crisis has been extraordinary.

Here are just a few examples of the company’s actions, in alignment with Saudi government direction:

**operations**

When the Kingdom closed land and sea borders, and halted international and domestic air traffic, starting March 7, the company had to move fast to ensure the continued supply of key services and materials. Fortunately, Aramco had long ago laid plans across business lines to ensure business continuity.

All major oil and gas production plants remained fully manned, although measures were taken to ensure the health and safety of plant personnel. At refineries and production plants, offices and workspaces were regularly sanitized, and networks of digital sensors allowed maintenance and operations engineers to monitor the integrity and the performance of equipment.

At remote drilling rig sites, rig medics checked field personnel’s temperatures on a daily basis, and a newly digitalized logistics system ensured the arrival of supplies in remote areas on demand, with the already established network of companies based in Saudi Arabia under the iktva lo-

A newly developed Smart Helmet recently deployed at Hawiyah Gas Plant is capable of performing the rapid screening of multiple employees — both indoors and in the field — and at a safe distance of up to five meters.
calizaion program, which guaranteed we had the specialized parts and services that kept our operations going. Tying all these parts together, from wellhead to terminal, the company’s Oil Supply Planning and Scheduling group kept a careful eye on all areas, so that every customer received the products they needed, when they needed them.

**Information Technology**

Careful planning also allowed the company’s IT organization to maintain business continuity, just as the nature of the company’s business environment was changing dramatically. With thousands of office personnel sent home to prevent infection at the workplace, IT stepped in to make sure every employee working from home could continue to be productive with laptop computers. Business meetings that previously were held in-person were deemed to be no longer safe; IT ensured that all desktop and laptop computers were equipped with the Skype for Business application.

Behind the scenes, backup command and control centers were set up across the Kingdom, managing and controlling the company’s computing, communications, and cybersecurity operations. On-site support for critical operations were maintained, and help desk support was expanded to make sure that all employees, remote and on-site, had the tools they needed to get their work done.

**Community Services**

For critical personnel who worked at Aramco offices and facilities throughout the Kingdom, and for those who have been returning to workplaces more recently, the company sustained an intensive sanitation regimen to keep the workforce safe. The company’s Visualization Center, operated by Office Services, monitored the availability of office space and tracked inspections in the field. A COVID-19 help desk handled requests from community members. In addition, as office buildings and community facilities reopened, the company provided users with the reassurance that their safety remained a top priority.

**Human Resources**

Keeping track of the 70,000 employees and more than 172,000 contractors working at Aramco, and making sure the company’s manpower needs were met, the company established a Human Resources Intelligent Solutions Center to provide real-time workforce insights with scenario planning, benchmarking, and an ability to provide multiple data views. The company also set up a Training and Development COVID-19 Support Center — operating 24 hours a day, seven days a week — to help thousands of employees and company-sponsored college students stranded outside the Kingdom to return.

**Security**

In coordination with the Ministries of Interior and Health, Aramco developed plans for keeping the company’s communities and workplaces safe and healthy. Industrial Security monitored compliance with curfews and lockdowns, but also created procedures and mobile apps to track the health of employees and to arrange travel permission for those employees needing to travel during curfew.

At entry gates, physical distancing was enforced through queuing procedures that involve floor markings and the creation of more than one queue to prevent congestion. Thermal sensors at entry gates checked the temperatures of each employee on the way to work.

**Corporate Affairs**

The nerve center for coordinating company activities with Saudi government authorities was the Government Affairs Command Center. The 24-hour center led communication with government agencies to address COVID-19 issues such as curfews, transportation clearances, and quarantined employees and dependents.

By monitoring and anticipating regulatory and policy changes, and proactively ensuring compliance, the Command Center helped to reduce the impact on company operations. Separately, the company showed its commitment to Corporate Citizenship by donating money and medical equipment to the communities where it operates, not only here in the Kingdom, but around the globe.

As the Kingdom’s infection rates continue to drop, Aramco has played its part in keeping our people, communities, and operations safe.
a hand providing the world with energy
and another protecting the environment

by Musleh Al-Khathami

Decades ago, Arabian oryx, sand gazelles, and dhub enjoyed freedom and habitat on almost three-quarters of the Kingdom’s land area. The company, since its foundation by the Arabian Gulf Oil Company in 1938, has continued to protect and restore the environment and natural resources on which the Kingdom’s economy and society depend. Through the various phases of its operations, Aramco has grown from being a small explorer to a global energy player and has played an active role in meeting its environmental obligations, thereby setting examples of sustainable development.

Utilization and Storage Project reduces carbon emissions

One of Aramco’s most effective contributions to its corporate social responsibility agenda is the Utilization and Storage Project, which captures and stores CO2 emissions from the company’s Onshore/Offshore operations. Also, our Carbon Capture, Utilization and Storage (CCUS) program launched in 2000, which resulted in the capture and storage of about 1 million metric tons of CO2 per year from the West Kuwait Refinery. In addition, we will continue to implement an innovative technology to store CO2 from our onshore operations, and capture 2 million metric tons of CO2 annually. The project is projected to store more than 4.3 million tons of CO2 per year.

As Aramco’s operations have grown, so have its initiatives in the various regions of the Kingdom. Each with its unique climate and environment, these programs have protected marine and coastal wildlife and have been instrumental in protecting the mangrove ecosystem. Aramco’s Environmental Protection, who works in Dhahran, states: “a man working to preserve one of the Kingdom’s rarest treasures — the Asir magpie, the only bird that makes its home exclusively in Saudi Arabia exclusively its home. Working to preserve one of the Kingdom’s rarest treasures — the Asir magpie, the only bird that makes its home exclusively in Saudi Arabia.

Planting mangrove trees and taking care of the gulf

Aramco has launched an initiative to protect the Arabian Gulf’s coastal areas, one of the world’s richest marine ecosystems, and has worked with the Royal Commission for Al-Jouf to implement an initiative to plant over 1 million mangrove saplings. These plants and animals are protected and find their way to prosperity within the area’s mangrove forest, salt marsh, and intertidal habitats. In addition, the company has developed a mangrove eco-park with an educational visitor center, and an elevated boardwalk traversing the mangrove, salt marsh, and intertidal habitats.

Aranscos will be among those throughout Saudi Arabia who will be participating in the Engagement Group of 20 (G-20) event planned this November. As the event host, the Kingdom will hold meetings that bring together ministers, senior officials, and civil society representatives. These employees will be able to participate in a number of events held as part of the gathering, sharing their opinions and expertise, using their expertise in fields ranging from business fields, and Human Resources to arts and cultures (Ithra) to enrich and experience this first-ever event for the Kingdom.

Even before the event, they have taken an interest in engaging on issues such as diversity in the workplace, technology, and the Kingdom’s circular carbon economy initiative.

**What is G-20?**

The Group of 20 (G-20), established in 1999, is the main international economic cooperation forum that includes leaders of developed and developing countries from all continents. The G-20 member states together comprise 80% of the world economy, two-thirds of the world population, and three-quarters of world trade volume. Representatives of the G-20 countries meet to discuss financial, social, and economic issues.

**How does the G-20 work?**

The host country, which presides over the group, holds several meetings that bring together ministers, senior officials, and civil society representatives. On the level of governments, the work of the G-20 focuses on the financial course and the Sherpa, which represents civil society communication groups.

**Financial course**

Meetings of the G-20 finance ministers and central bank governors and their deputies focus on financial and monetary issues such as the world economy, infrastructure, monitoring of financial systems, financial comprehensiveness, international financial structure, and international taxes.

**Sherpa course**

In these meetings of relevant ministers and senior officials, the focus will be on socioeconomic issues such as agriculture, combating corruption, climate, digital economy, education, labor, energy, environment, health, tourism, trade, and investment.

**Engagement groups**

Engagement groups represent the civil society, developing and presenting recommendations to G-20 leaders for discussion. Engagement groups include the B-20 (Business 20), the Y-20 (Youth 20), L-20 (Labor 20), T-20 (Think 20), C-20 (Civil Society 20), W-20 (Women 20), S-20 (Science 20), and U-20 (Urban 20).

**Ithra celebrates National Day with education, entertainment, and more**

Dhahran — The King Abdulaziz Center for World Culture (Ithra) will celebrate Saudi Arabia’s 90th National Day with a vibrant package of programs to entertain and educate. The programming offers visitors the opportunity to engage with Saudi culture from across the Kingdom while exploring the nation’s rich diversity.

Ithra’s National Day festivities include exhibitions, family activities, a board game competition, a quiz-based scavenger hunt, storytelling, food, dance, poetry, and music performances.

**education and entertainment**

The Kingdom of Cultures exhibition, running from Sept. 21 to Dec. 20, takes visitors on a journey through Saudi Arabia’s lands and tells stories about the Saudi people. The exhibit is a treasure trove of Saudi culture featuring untold tales, crafts, dialects, and various Saudi customs. Visitors will immerse themselves in exceptional experiences and explore the Kingdom’s environment. The exhibit delivers a unique deep dive into the rich heritage, history, and diversity of Saudi Arabia.

Along with the education will be plenty of entertainment to complement the festivities. The musical performance by Al Farabi band will feature Abeer Balubaid on piano and Ameen Faris on vocals. Saudi poet Abdulatif bin Yousef will host an evening of poetry — Aswat — accompanied by musicians in celebration of Saudi civilization.

**fine art and fine food**

To reinforce Ithra’s mission as a source of creativity, inspiration, and positive impact, it will launch The Market program as part of Ithra’s National Day outreach programs. The Market is a place making project based on revamping the central farmers market in al-Khobar and giving it an energetic, artsy edge.

The covered space in al-Ulaya will be redecorated and feature areas for art and music, in addition to the dedicated and upgraded section where local farmers can sell their produce. Ithra plans to curate installations at The Market to elevate the place, make it more visually exciting and to bring art and creativity more directly to the community. Also, Ithra plans to create an art mural in al-Hasa, one of the largest oases in the world.

During the celebration, Ithra will also host Taky, a pop-up restaurant, featuring fine dining Saudi fusion cuisine. Food trucks will be stationed around Ithra, serving snacks and beverages to replenish visitors as they enjoy the Saudi National Day festivities.

The Ithra National Day celebration kicked off Monday and will run through the weekend. For everyone’s safety, there will be two celebration sessions per day, and space will be limited. Tickets are required, and special tickets are required for the performances by Al Farabi band featuring Abeer Balubaid and Ameen Farsi, and Aswat: Poetry Night with Abdulatif bin Yousef.

For more information or to buy tickets, visit www.ithra.com.
future projects in the Kingdom step toward Vision 2030

by Shatha Al Otaibi

Across the Kingdom, various future projects are expanding rapidly toward a bright and prosperous tomorrow. Far from the dry language of numbers, once completed, these projects will be life changing throughout the Kingdom. Some may even shift the map of economy for the entire region.

1. **King Salman Energy Park (SPARK)**
   - SPARK strives to be a prominent and an integrated global energy industrial center, relying on innovation, cooperation, and a strong governance. It will become a viable 21st century ecosystem in the energy sector — constituting a vibrant international industrial community.
   - SPARK is expected to provide a huge impact on the national economy, providing jobs and Saudizing industrial sectors Kingdomwide.

2. **Qiddiya**
   - This new city will cement the Kingdom’s global position as a regional and international center for innovative and exciting experiences in the fields of entertainment, sports, and arts.
   - Visitors will be able to enjoy over 300 leading entertainment and educational facilities across several unique sectors, including theme parks, sports facilities, leading training academies, and a number of historical, cultural, and educational activities and events.

3. **Neom**
   - Contributing to the growth and diversification of income to the national economy, Neom is a key part of the Kingdom’s endeavors to enhance its leadership position globally. Although the Kingdom has been financing and guiding this project since its inception, it is a global project with various investors around the world.
   - The methodology of Neom is based on innovative thinking and new solutions — building an economy and a society linked to the future.

4. **Red Sea Project**
   - A luxurious tourism project which strives to preserve a sustainable nature within the region, protect the coastal landscapes and enhance tourism potential. With an archipelago of over 90 islands, a vast coastline, desert mountains, craters, dormant volcanoes, and islands, it provides a set of exclusive experiences for tourists worldwide — placing the Kingdom in a prominent position on the global tourism map.
   - Another goal is to strengthen the partnerships between public and private sectors, open ways for business owners and young entrepreneurs, and lead to parallel development paths, such as airports, ports, road networks, and housing sectors — constituting a qualitative leap in the economical, tourism, and investment fields.

5. **Amala**
   - Amala is a tourist destination on the Red Sea Coast, which strives to establish an entirely new concept of luxury tourism focused on recovery, health, and treatment. It presents an unprecedented level of luxury hotels and private villas, and follows a distinctive design that reflects high taste. With a contemporary art village, Amala will provide a unique experience for resident artists, guests, and academics specializing in the arts.
The crisis call to culture

Resilient Ithra in action and busy, busy, busy

by Daniel Kany

Dhahran — As the world came to realize that COVID-19 represented the true danger of a bona fide pandemic, cultural offerings ground to a halt. Museums were shuttered. Orchestrmas were silenced. Galleries closed. Theaters emptied. Everyone was sent home.

Well, almost everyone.

The sidewalks were cleared of people, but certain pathways saw more traffic than ever. To put it mildly, business was suddenly booming at companies such as YouTube, Netflix, and Zoom.

Some diverse cultural institutions were already using their virtual platforms in creative and robust ways.

Despite the pandemic, Ithra has continued to expand its presence, whether it was through live events (with physical distancing rules strictly observed) or virtually through groundbreaking programs such as Ithra Connect, traveling events such as parades, and even the partially virtual Saudi Film Festival.

The doors of the King Abdulaziz Center for World Culture (Ithra) may have been closed during the pandemic, but it was busier than ever, more than doubling its public programming.

The flagship of Ithra’s quarantine-time efforts was Ithra Connect, an online initiative that presented more than 50 programs to the public. These ranged from original videos and the collective COVID-19 Diary to quiz shows and live society meetups on Zoom.

Ithra Library membership was made free so its digital books could be accessed by anyone. Ithra Connect included offerings for children — do-it-yourself project videos, the daily Live from the Children’s Museum, storytelling podcasts, and even a virtual summer camp.

For art audiences, Ithra launched a virtual tour, videos about exhibition objects, expert interviews, and a live international Re-siliArt debate in partnership with UNESCO. Particularly popular programs have included:

• Optical Illusions — a 10-episode video series with Argentine master illusionist Lucas Di Giacomo
• Ithra Talks, with guests such as the actor Idris Elba and architect Kjetil Thorsen, whose firm Snøhetta designed Ithra
• A drive-in ‘1d experience where visitors stayed in their cars while enjoying performances, laser shows, and interactive games
• Most recently, the sixth Saudi Film Festival, purely virtual for the first time.

With the mission of interacting with world culture, Ithra was already focused on its website, app, and social media platforms. The pandemic just made it the priority.

Ithra’s virtual visits jumped by more than 400% as tens of millions of people from around the world tuned in to experience the educational gifts of Saudi culture.
protecting the community

no easy feat

by Rawan Nasser

Life pre-COVID-19 seems like the distant past. As we ease back into our daily lives and adapt to a new reality, it is worth reflecting on the year we’ve had and the efforts of the Kingdom and the company in helping to curb the spread of the new Coronavirus pandemic.

As active cases increased around the world, the Ministry of Health took swift action, mobilizing all resources to educate and protect the community with the goal of flattening the curve and helping us get back into a “new normal.”

Supporting these efforts, Johns Hopkins Aramco Healthcare (JHAH) also launched a full-fledged bilingual outreach campaign on Jan. 27 following the World Health Organization epidemic response checklist.

And to sustain operations during the pandemic, JHAH activated a business continuity plan, which included setting up a COVID-19 help desk with a dedicated certified medical staff to provide timely support, and offering patients virtual appointments with their doctors.

In the spirit of celebrating our achievements, here are the top six actions that JHAH took to safeguard our communities and protect our quality of life:

1. Spreading Awareness

JHAH began a partnership with Aramco Training & Development to provide the community with vital infection prevention knowledge. Three bilingual e-Learning modules were created and launched within three days. The included a COVID-19 overview, a home isolation guide, as well as tips on how employees can return to work safely, and an Emotional First Aid course for practicing healthcare professionals.

The hospital received more than 17,000 incoming calls to the COVID-19 Care Line since March, and more than 40,000 calls to the Nurse Care Line.

To limit crowding and to keep patients safe, JHAH set up a drive-through medication pickup kiosk in Dhahran, in addition to the 24 existing medication pickup locations. This allowed patients to pick up their prescriptions while following infection prevention best practices.

2. Care in the Time of Physical Distancing

For medical checkups and appointments, patients were given the option to speak to their physicians over the phone or to meet with them virtually on MyChart. Since March, there has been more than 83,000 telephone visits, and more than 7,000 video visits.

JHAH also initiated support care lines staffed with experts to help those looking for answers to medical or emotional health questions related to COVID-19, or in need of care support related to domestic abuse. The hospital received more than 17,000 incoming calls to the COVID-19 Care Line since March, and more than 40,000 calls to the Nurse Care Line.

3. Addressing Mental Health

JHAH’s holistic engagement plans considered the community’s need for mental health support during trying times. The online Mental Health Tool Kit was created to support the community’s emotional resilience in dealing with the pandemic and the Mental Health Tool Kit booklet is available on JHAH.com in both Arabic and English for those interested. (QR code attached)

4. Taking the Lead in Testing

In March, JHAH Dhahran became the first drive-through screening station in the Kingdom, where patients were tested for COVID-19. The facility was built to accommodate up to 500 users per day, including employees and the contracted Aramco workforce.

In April 2020, the JHAH Dhahran lab was granted approval by the Ministry of Health for COVID-19 in-house testing with Polymerase Chain Reaction (PCR) technology — a “golden method” for COVID-19 testing. The implementation of the in-house COVID-19 testing dramatically reduced the turnaround time it took to retrieve diagnostic results.

5. Providing Safe Quarantine Facilities

JHAH established multiple designated quarantine facilities with a total capacity of 1,243 rooms, staying ahead of volume demand while implementing strict safety procedures for the benefit of patients, doctors, and staff.

For medical checkups and appointments, patients were given the option to speak to their physicians over the phone or to meet with them virtually on MyChart. Since March, there has been more than 83,000 telephone visits, and more than 7,000 video visits.

6. Extending a Helping Hand

During the Qatif lockdown, JHAH established a satellite oncology clinic, staffed by JHAH employees with access to the JHAH electronic medical record system to sustain patient safety during lockdown. This included services such as chemotherapy, blood transfusion, dialysis, and treatments for critical patients residing in Qatif.

JHAH also supported Saudi Arabia’s COVID-19 international humanitarian relief mission. Dr. Abdullah Alrabiah, General Supervisor of the King Salman Humanitarian Aid and Relief Center, assigned JHAH Supply Chain to source 17,000 items of emergency medical equipment and supplies for the COVID-19 pandemic, with a value of SR361,076,679. JHAH completed this ambitious task in four working days.

These are only some of the efforts taken by the JHAH medical center. We cannot thank their staff enough for the sacrifices they’ve made to ensure that all clinics are providing world-class care to employees and the wider community, and keeping us safe.
